

Teaching Tip:

Accessibility and Privacy Statements

At University of South Carolina Upstate, all students have equal educational and technological opportunities in the classroom. Students have a right to know the privacy and accessibility policies of the tools they use.

Purpose and Applications

You can use Accessibility and Privacy Statements to:

- Meet your instructional responsibility to inform students about the tools they will use in the classroom.
- Empower students to make informed choices about how to share information and how to access course tools in a format that meets their needs.

Accessibility and Privacy Statements for Common Software and Applications

Reference(s) to the statements of privacy, accessibility, voluntary product accessibility template (VPAT) documents, and/or Web Content Accessibility Guidelines (WCAG) statements should be provided to students in the syllabus/course either with direct links to these statements or by linking to this page for the latest statements.

- Adobe Creative Cloud [Accessibility Statement](#) and [Privacy Policy](#)
