

14th Annual SC Upstate Research Symposium

Roadmap to Medical School:

The early stages & the role of undergraduate research.

Presented by:

USC School of Medicine Greenville

April 13th, 2018

The Workshop: You want to be a doctor. You are on a pre-medical track at your college or university. What's next? What is the role of undergraduate research? Join us for a workshop focused on the admissions process, including a mock interview. We will address what medical school is like once you are accepted. You will learn about curriculum design and about a day in the life of a medical student. USC School of Medicine Greenville administrators, faculty and students will lead the workshop and take questions throughout.

To Participate: <http://www.uscupstate.edu/symposium>

WHEN:
April 13th, 2018

WHERE:
USC Upstate Campus
